Hi Lab T-shirt committee,

As we are finding a place to make our t-shirts, it seems the cost will vary depending on how many images (more printing costs more), and what color ink we use.

Here is what I propose:

One color of ink for all designs.

Option1:

Back: Arnold arboretum logo (see attached)

Sleeve or pectoral: UBC forestry logo (see attached, please specify which you like better)

Option 2:

Back: Arnold arboretum logo (see attached)

Sleeve or pectoral: UBC forestry logo (see attached, please specify which you like better)

sleeve: "Temporal Ecology Lab" or something else.

Option 3:

other ideas.

pricing. Deidre found a few places that could make them locally in BC, but the cost seems to be \$40+ per shirt.

The company we used in JP last time charged \$13 for mens cut and \$ for women's, for a 2 image black/sleeve shirt. We could use them again, but then, depending on whether or not they would be ready before the lab retreat, we'd have to factor cost of getting them to Vancouver.

Lizzie, how many shirts total are you thinking?

Please let me know any thought or opinions you have soon, so we can get this cotton ball rolling.

Thanks,

Dan
