Hi Lizzie,

Here you go! In white, beige (just an idea), and light grey. If the design is white I would go for the Olive Triblend or Solid Dark Grey, but if the design is beige or light grey I actually think having it on the Solid White Triblend or Solid Natural Triblend would be better, as those colour combinations are easier to match with other colours/clothing. It would also definitely be more adaptable because the colour pairing is understated, so the design will be visible but not on a highly contrasting background. These are just my thoughts though...feel free to go with what the majority decide, or whatever you like most !

Best regards,
Justin

Hi Justin,

One last request, can you remove the extra image on the lower right with 'wolkovich lab' and/or send me the ai file?

I will especially take your design advice on what color shirt and what print color to request!

All the best,
L
